

Reliable Water Storage for a **Sustainable Future**

GRP Panel Tanks
HDG Steel Panel Tanks
SS316 SS304 & SS444 Panel Tanks

Company Introduction

At Aspire Solutions, we are dedicated to delivering premium water storage solutions as the authorised distribution and installation partner of Sunnik Panel Tanks in the region. Our mission is to be Saudi Arabia's most trusted name in the water storage solutions industry, supporting the Kingdom's growth and development vision.

We are committed to delivering reliable Panel Tanks that are built to last and engineered to withstand the region's demanding climate and environmental conditions. Through innovation and reliability, we aim to set new benchmarks for water storage excellence across the Kingdom.

With a presence in over 42 countries worldwide and compliance with top-notch international standards and certifications such as NSF and WRAS, Sunnik has earned the trust of clients across diverse climates and industries from the Middle East and Asia to Africa, Europe, and beyond ensuring reliability, safety, and durability.

We aim not only to meet but to exceed customer expectations with our service and delivery. Our ambition is to be the partner of choice for organisations seeking trusted, future-ready water storage solutions that create long-term value for our clients.

We look forward to supporting your upcoming projects with world-class water storage solutions tailored to your needs.

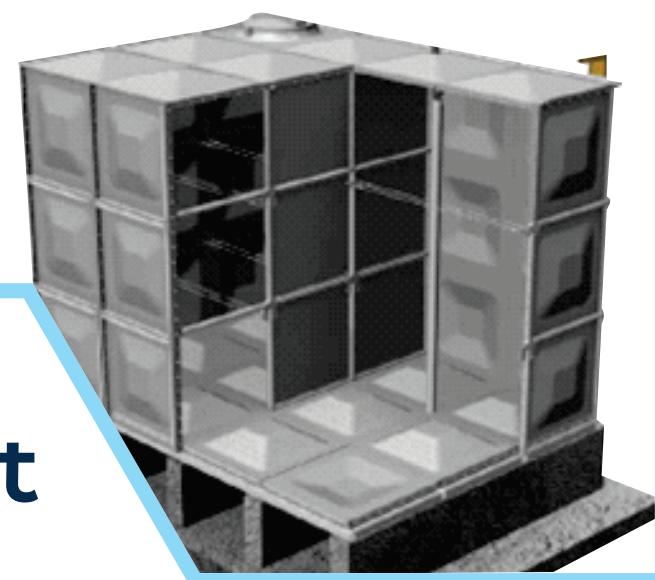

SUNNIK GRP Panel tanks

Glass Reinforced Polymer (GRP) combines strength, durability, and light weight, making it the material of choice in industries that demand reliability. Sunnik has perfected this technology to create GRP Sectional Panel Tanks that out perform traditional storage methods.

Sunnik GRP tanks are modular, hygienic, weather and disaster-resistant, all while offering exceptional strength-to-weight performance and long service life with 6X Safety factor and Compliance with Global Quality Standards such as BS EN 13280, SS245:2014, and WRAS BS6920:2014.

Sunnik GRP tanks deliver superior insulation, with thermal conductivity 240 times lower than steel—keeping water stable in extreme KSA climates. Optional 25mm or 50mm polyurethane foam boosts energy efficiency.

Product Range

SUNNIK HDG Steel Tanks

Hot-Dip Galvanized (HDG) Steel is renowned for its exceptional strength, durability, and corrosion resistance, making it a trusted material for heavy-duty industrial and infrastructure applications. Sunnik leverages this proven technology to deliver HDG Steel Sectional Tanks that offer robust and reliable water storage solutions.

Sunnik HDG Steel Tanks are high-strength, long-lasting, and adaptable to a wide range of applications. Their resilience against mechanical stress and demanding site conditions makes them the preferred choice for large-scale potable water & industrial liquid storage projects across the globe.

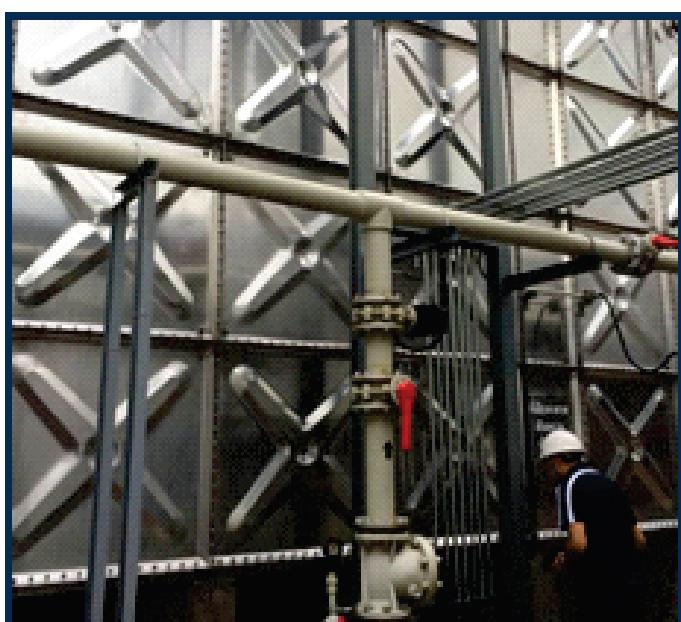

SUNNIK Stainless Steel Tanks (SS304, SS316, SS444)

Hygienic & Durable: Engineered for superior corrosion resistance and long-term performance, Sunnik Stainless Steel Tanks ensure safe, reliable storage for potable water and industrial applications.

Stringent manufacturing using dedicated stainless-steel equipment ensures top-quality panels free from contamination by corrosion-prone metals.

Certified Excellence: NSF61/ANSI/CAN and FDA food-safe certified, fully compliant with AISI standards—Sunnik is the first in Malaysia with SPAN approval for municipal water use

Sunnik's Exceptional track-record

Sunnik has a strong presence across the Middle East, with its modular panel tank systems installed in major infrastructure and commercial projects. In Saudi Arabia, SS444-grade tanks supplied for the Tadawul Tower highlight its local credibility and proven performance.

In the UAE and beyond, Sunnik supplied SS316 stainless steel water tanks for the iconic Burj Khalifa, along with installations in The Sports City Tower, Doha, and key water treatment, fire protection, and desalination facilities across Qatar and Oman.

Sunnik has delivered reliable water storage solutions for landmarks such as the Petronas Twin Towers and Kuala Lumpur International Airport (KLIA I & II), reflecting its engineering excellence and project reliability.

Built for the Gulf's demanding environment, Sunnik's GRP, HDG, and stainless steel systems offer proven durability against high temperatures, salinity, and strict regulatory standards, making it a preferred choice for large-scale water storage projects in the region
